Please read the accreditation standard we are accountable to meet:

IMQ Standard on Content Validation	
1	All the recommendations involving clinical medicine in a CME activity must be based on evidence that is accepted within the profession of medicine as adequate justification for their indications and contraindications in the care of patients.
2	All scientific research referred to, reported or used in CME in support of justification of a patient care recommendation must conform to the generally accepted standards of experimental design, data collection, and analysis.
3	Providers are not eligible for ACCME or CMA/IMQ accreditation or reaccreditation if they present activities that promote recommendations, treatment, or manners of practicing medicine that are not within the definition of CME, or known to have risks or dangers that outweigh the benefits or know to be ineffective in the treatment of patients.

Please list all the evidence-based references you are using to support this presentation.
